ABSTRACT

This article presents a current issue that can be observed by different media and it has caused and causes several problems around the households. Indeed, stages such as childhood, where the psychological foundations, values and life of individuals are often marked by situations that are not as encouraging providing experiences that help in the growth and maturity of individuals are generated. Childhood is a crucial stage where these pleasing or disappointing experiences give strength to be. Although society indicates that the child should go unnoticed and not be afflicted with things that should not worry them.

But there are negative actors in the environment that they seek to damage and to start this vital cycle, to realize that the basic structures have weakened in the company, as the family, the work, the school.

These negative actors have been changing criminal groups with a leader who directs them to organized crime with solid structures.

Keywords: Childhood, drugs, family, society, life.

Introduction

Today, the family is developed in an ever changing environment and new negatives actors promoting illicit business.

In all these existential situations parents nor the children is not chosen. But you can choose to stay or go, linked or unlinked continue, work to improve and grow every relationship or discourage it. He is responsible for relations that are chosen and the type of relationship that is established and has. (Soler, 2013, chapter 3)

This document displays the present problem of organized crime to extend their criminal actions towards drug use in childhood, raising overall objective as follows: Determine the causes of drug use in childhood in Ecuador,

For this is set to specific objective:

- Analysis of children and their environment.
